I immigrated to the USA 8 years ago, began my career in the hospitality industry largely thanks to my friendly and outgoing personality. I excelled at the top in each business I worked in, from a waiter to a Banquet Manager, and provided the best customer service experiences at Terrace On The Park. My passion for breaking down machines regarding both software and hardware into bits, and putting them back together like puzzles at my young age motivated me to gain problem-solving skills. These skills helped me get a BS in Accounting. Also, I've always had an eye for design, which led me to achieve a Graphic Design certificate at Microsoft and work as a professional for two years before finishing college. Although I was always interested in seeking a field that connects all my skills and encourages me to continue learning, this is when I chose to attend Flatiron Bootcamp for Software Engineering. Lastly, when I am not programming, I am exploring the world and blogging about it.

EDUCATION

Flatiron School	Manhattan, NY
Full-Stack Software Engineering	Top 10 of 05/2020 class
